THE STRESS IS TAKING ITS TOLL

The tension over her wedding standoff with William is having an obvious effect on Kate. Reveals an insider, "Her weight loss has everyone talking!" Dr. Eric Braverman, founder of PATH Medical, notes that Kate has dropped about 20 lbs. "Prolonged stress can alter your blood-sugar levels, leading to loss of appetite, which can cause weight loss," the New York City-based medical expert, who has not worked with Kate, tells *Star*. "She's clearly anxious," admits a pal.
